DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is insufficient structure set forth in the claims to determine a container body or the ramp, how the ramp defines more than one plane, and the ramp's function with respect to the other parts of the container. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. Therefore, it is suggested the claims be amended to include structural details to more clearly set forth the claimed invention.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hupp (WO 01/51378).

To the degree set forth in the claims and given the broadest, reasonable interpretation, the inclined surface of the fastener is a ramp. Moreover, the portion 64 is also a ramp that extends from the first end of the closure further having an inclined surface extending out of the plane of the fastener.

Regarding claim 17, a portion of the fastener lies multiple plans, thus defining more than one plane.

Response to Arguments

4. Applicant's arguments filed September 13, 2004 have been fully considered but they are not persuasive.

Art Unit: 3727

Regarding the rejection under 35 USC 112, 2nd paragraph, while it is agreed it is not necessary to provide "a description of the function of each element with respect to the other elements recited", it is necessary to provide structural details and relationships to clearly set forth the claimed invention. Although the claims are read and interpreted in light of the specification, including the drawings, these details are not read into the claims to determine the structure and the spatial relationships between the structural parts. For instance, It is unclear from the claims how the reclosable fastener is disposed between the container body and the cover to fasten the cover to the container, the difference between the track comprising a fastener portion formed on the reclosable fastener and the reclosable fastener, and how the slider moves along the track to open or close the fastener.

Regarding the rejection in view of Hupp, the claims are given the broadest reasonable interpretation. Wherein the claims do not clearly set forth the claimed invention, the container of Hupp anticipates the claims as set forth above.

Again, the claims can only be read and interpreted in light of the specification. Limitations from the specification are not read into the claims.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3727

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

7. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. _____ is being facsimiled to The U.S. Patent and Trademark Office via fax number (703) 872-9306 on the date shown below:

Typed or printed name of person signing this certificate
